

## NELA Leadership Course.

After just completing the leadership Course I feel that I better understand the structure of the NHS. How the different organisations work, where they fit with each other and in the overall funding landscape.

It has helped me evaluate my position, where I am now and decide how I will move forward. To understand the fact that we all can make a difference with varying levels of commitment and competence.

I intend to pursue a couple of items to fruition.

Something that I would have only raised in the past, expecting/hoping that someone else would think they had merit and carry them forward.

Although the course tries to be a one size fits all, no one on the course appeared to be left out.

All in all the course was well worth doing.
